DETAILED ACTION

Drawings

1. The drawings were received on September 4, 2008. These drawings are approved.

Claim Objections

2. Claims 4 and 5 are objected to because of the following informalities: although the parenthetical reference characters are only used for reference and are not relied upon for structural limitations of the claims, (19) is associated with both “inner skirt” and “outer skirt” and (10) is also associated with “inner skirt”. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. Claims 2-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 5 does not clearly set forth
4. Claims 2-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The structure of the tubular container is not clearly set forth.

- The phrase “while in an interior of the screw-threaded neck” suggests the interior wall is removable from the interior of the container neck. How is this possible?
- How is the solid projection as part of the container “fixed to and extending up from” horizontal wall when the horizontal wall is not set forth as part of the container?

Art Unit: 3781

- The phrase “with a tube and cap” does not positively indicate the tubular container with a tamper-proof device “comprises” a tube and cap.
- There is no structure set forth for the “tamper-proof device”.
- Where in the interior of the cap is the flexible tongue located? Is it on the inner skirt, the outer skirt, or the top surface?

Allowable Subject Matter

5. Claims 2-5 avoid the art and appear to be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 1st and 2nd paragraphs, set forth in this Office action.

Response to Arguments

6. Applicant's arguments with respect to claims 2-5 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F.R. 1.111, including: “The reply must present arguments pointing out the specific distinctions

believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims "define a patentable invention" without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06 II(A), MPEP 2163.06 and MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.
